

HOBART has a surprise in store for Milan

The HOST trade show runs from 17 to 21 October in Milan and HOBART will be attending and presenting its latest warewashing and cooking innovations. In addition to live demonstrations and cookery shows, visitors to Hall 5 (booth B23 / C24) can enjoy an overview of the latest warewashing products for 2026.

Offenburg, 10 September 2025 – Ahead of the product launch next year, HOBART will be providing an overview of the next generation of its warewashing products at the HOST trade show in Milan. The specialist international trade show runs from 17 to 21 October 2025 and is one of the key events for keeping in touch with partners and customers in Italy and other export destinations. The company's booth (B23 / C24) in Hall 5 will be focussing on efficiency: Faster work processes, lower operating costs, less manpower.

Artificial intelligence is revolutionizing the way we wash

HOBART's new FLOW Line will also be creating a stir at HOST. Thanks to SMART VISION CONTROL, the flight-type dishwasher automatically detects when an item is placed on the conveyor and how dirty it is. The machine's artificial intelligence automatically adapts the washing process on the basis of this information. This simplifies the task in hand, cuts costs and innovatively demonstrates the significance that technologies like this will play in large-scale kitchens in the future. "HOBART has developed new products that use AI-supported technology to achieve smooth, automated warewashing processes while significantly reducing operating costs," says Managing Director Manfred Kohler. "This revolutionary innovation ensures the perfect flow for warewashing processes." Trade show visitors will get an insight into the new technology on the HOBART booth.

One machine for washing and polishing

With HOBART's new undercounter dishwashers, there is no need to manually polish cutlery. The optional CUTLERY PREMIUM feature uses a washing and polishing process developed in-house to save valuable time, allowing service staff to concentrate on other jobs. The new generation of undercounter dishwashers also features even more smart features, which simplify the job in hand and counteract a caterer's high operating costs. HOBART will be running live demonstrations on its booth to show how reliably CUTLERY PREMIUM works and the other new features that have been implemented.

Cookery shows with the CHEF'S COMBI

Your taste buds won't be disappointed on the HOBART booth either. Visitors to the trade show will be able to see various machines in action as part of regular cookery shows. These will focus on the new CHEF'S COMBI. The combi oven is characterised by easy handling, powerful cooking programmes, efficient cleaning, and low operating costs – and all that for a very attractive price. Visitors to the HOBART booth in Hall 5 will also be able to see for themselves the smart features of the premium combi oven and sample the tasty meals being prepared.
