

## Utensil washers equipped with new features

**The utensil washers HOBART UP/UX and ecomax U704 come with a refresh: both get a new display and control interface. The new UP/UX series are available with the new VISIOTRONIC-TOUCH display in black and has a lower water consumption than the previous models.**

Offenburg, March 18, 2024 – You can find utensil washers in all professional kitchens, because they are very versatile. They make it easy to wash even the biggest equipment items like baskets or large baking trays and are therefore often used in bakeries and in the meat industry as well as in commercial kitchens. Special features like the innovative side wash system are unique and make the HOBART utensil washers UP/UPT more efficient than comparable products.

Now the HOBART and ecomax utensil washers are equipped with new features: The HOBART utensil washer comes with the black VISIOTRONIC-TOUCH single button control. Not only is the new display an eye-catcher, but it makes operating the machine even easier and more intuitive than before. Furthermore, the UP/UX utensil washers come with a WiFi connection and the option to use the HOBART SmartConnect app. Last but not least, the new UX models are more sustainable than the previous one. They have lower water consumptions, so customers can save money on every wash cycle.

The ecomax utensil washer U704 (previously ecomax 702) presents with a new standardized ecomax control and interface for easy operation. Both new models will be available from April 1<sup>st</sup>, 2024 in all HOBART Export countries.
