PRODUCT ADVANTAGES

- **VISIOTRONIC control:** single button control with remaining time indicator together with text and graphic display
- SENSO-ACTIVE resource management: constantly measures the quality of the wash water and keeps the amount of rinsing needed in each rinse cycle to the minimum in order to guarantee a fully hygienic wash result
- **POWER wash:** high-pressure washing to wash heavily soiled wash items
- **CLIP-IN wash and rinse arms:** wash and rinse arms can be removed with one hand and without any tools
- **USB-interface:** comfortable download of operational data in form of a protocol via USB
- **GENIUS-X² fine filter system:** advanced filter system with pre-wash function reduces detergent consumption up to 35 %
- ROTOR-X wash system: separate rotating upper and lower 4-spoke wash arms deliver dynamic wash power
- **VAPOSTOP (optional):** prevents vapour to escape from machine when door is opened
- The optional **drain heat recovery** transfers heat from hot drain water to the fresh-water supply, saving up to 8.6 kW
- The optional **exhaust heat recovery** uses steam to heat fresh feed water and reduces the amount of power needed, saving up to 5.2 kW
- Loading height: above-average loading height of 860 mm
- Intelligent energy management: the available energy is used continuously. Thus, at a low total loading value the heating time gets reduced
- Interlocked strainer: prevents operation without tank strainer
- **EASY-CLEAN concept:** blue markings in the machine help the operator to identify the components which require cleaning
- Hygiene programme: for removal of calcium carbonate and other deposits from wash chamber

^{*} Thermostop guarantees required temperatures with cold water connection, the actual cycle times extend accordingly. For machine protection the water hardness should not exceed 3°dH, if higher we recommend using an integrated water softener or an external water softener of the product line HYDROLINE PROTECT.
